

## PORTFOLIO OVERVIEW

### Where do I go to get an overview of 54 Initiatives?

Initially 20 overall strategic initiatives were defined in a development plan by the VDC management team in MT Højgaard. In order to make the plan operational, the 20 overall initiatives were broken down into 54 more operational and actionable initiatives. These were all put into ActionPlanner to create a portfolio overview.

### Systematic follow-up becoming a part of the team DNA

On a regular basis, the initiatives were updated with traffic light reporting, comments and KPI's. Through a systematic follow-up process, the 54 initiatives were driven home securely by having clear project descriptions and good coordination throughout the entire process.

*"ActionPlanner has been an important part of planning 54 initiatives, creating overview and ensuring progress until successful completion."*

– Niels Wingsø Falk, Vice President, VDC

*The result was successful execution of 54 initiatives one year before scheduled deadline and below budget.*
